7.5m	3.9m	1.82m	1.29m
6.5m	3.9m	1.77m	1.32m

Majestic Slimline

The Majestic Slimline has been created for properties with narrow settings or for those that simply don't want the backyard dominated by a pool.

The Majestic Slimline's generous central entry point is both a huge swimout bench which also incorporates the step down into the shallow end of the pool.

This clever design leaves the entire precious swim area of the pool free for swimming and safe for children.

With square corners which allows 90 degree paving, child safety ledge and great water depth the Slimline Majestic is a truly fantastic swimming pool.

Available Sizes:

LENGTH	WIDTH	DEEP END	SHALLOW END

8.5m	3.5m	1.85m	1.25m
7.2m	3.5m	1.8m	1.28m
6.2m	3.5m	1.75m	1.32m

Alpine White Shimmer

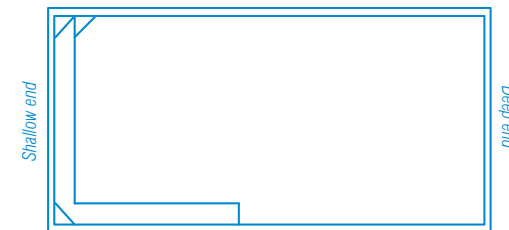

Monaco

Some things in life will never date and the Monaco is one of them. With four square corners, this rectangle pool is full of class and style. With dual entry steps located at both sides of the shallow end this pool can be conveniently placed in just about any area.

A major feature of the Monaco is the massive swim area inside the pool, with the seating area being located at the shallow end this allows for a totally free swimming area for the majority of the pool. This is great for kids who love to jump in and play around in the deeper areas of the pool.

Landscaping around this pool is best kept simple to complement the stylish design.

Available Sizes:

LENGTH	WIDTH	DEEP END	SHALLOW END
10.5m	3.8m	1.9m	1.2m

Plunge Pool

With houses becoming bigger and blocks getting smaller the Plunge Pool could be the perfect option for your backyard or courtyard area.

With square corners and a constant depth of 1.65m you could be forgiven for thinking this is a concrete courtyard or plunge pool design.

The swimming area is maximised due to the dual entry steps and compact bench seat incorporated across one end of the courtyard/plunge pool; making it very versatile with its placement in just about any setting.

Another great feature of the Plunge Pool is the small safety ledge incorporated into the vertical walls around the perimeter of the pool allowing parents to relax whilst the children are swimming.

This is the ultimate courtyard or plunge pool design!

Available Sizes:

LENGTH	WIDTH	FLAT BOTTOM

World Class Quality Proudly WA Made

We start with the best and improve from there. Our commitment to overall product quality ensures that we use the finest materials and innovative manufacturing processes to bring you the very best in fibreglass pools.

All materials supplied are rigidly controlled to meet performance specifications. There are no exceptions. This applies to gelcoat, resins, glass reinforcing materials, additional fixtures and fittings. All these materials are Lloyds of London/ DNV approved products for the manufacture of fibreglass swimming pools.

Our manufacturing process is monitored, documented, and recorded at every step, from the beginning process of preparing the mould, through to the full production, final detailing, inspection, storage, and transporting to the site. The operating conditions of the manufacturing facilities, such as temperature and humidity, are closely monitored and adjusted accordingly. There are clear and standardised procedures to each manufacturing stage of our pool shells.

Once the pool is released from the mould, stringent and comprehensive testing is performed. The gelcoat finish and colour is visually inspected. The hardness of the surface is measured, as well as the wall thickness being checked at more than 25 positions around the pool. This is done by ultrasonic mechanic testing and recording. Every pool is weighed using an electronic digital scale to ensure the specified amount of material has been used during production stages to meet standards.

Every pool is embossed with our name as well as a unique 5 digit number which enables tracking and tracing of that pool easy for everyone to identify. Our master files record and document quality tests and results. We also keep and store a cut out of every pool shell manufactured in our Barrier Reef Pools library, making it easy for future reference.

This proves that when you are buying a Barrier Reef fibreglass swimming pool you really are buying the best in the market place.

Child Safety Is Our Priority

“Put your mind at ease knowing that your child can find their way to safety”

- Children can find their way around the pool with confidence.

- No need for intrusive deep end seating.

- Maximises swimming area without compromising on safety.

- Increases structural strength.

Pool Construction - Seven Layers of Strength

LAYER 1 INTERIOR SURFACE FINISH

Advanced Pool Colour Technology gelcoat with an optional Lifetime Interior Surface Guarantee that is UV and chemical resistant using the best colour technology currently available.

LAYER 2 ANTI-CORROSION BARRIER

Highest quality Vinyl Ester resin layer, providing excellent bonding to Advanced Pool Colour Technology as well as superior chemical and water resistance for the highest protection.

LAYER 3 FIRST STRUCTURAL LAYER AND ADDITIONAL CHEMICAL RESISTANT LAYER

Additional layer of the highest quality Vinyl Ester resin combined with JUSHI E6-CR glass fibre to further increase corrosion resistance and strength to the laminate.

LAYER 4 SECOND STRUCTURAL LAYER

Consists of high quality Polyester resin and JUSHI E6-CR glass fibre with additional structural enhanced properties. No fillers used.

LAYER 5 REINFORCEMENT LAYER

Additional layer of high quality Polyester resin and JUSHI E6-CR glass fibre with additional structural enhanced properties added to the reinforcement structures on the pool shell. No fillers used.

LAYER 6 OUTER CORE LAMINATE

Klegecell/Divinycell sandwich core laminate is used on luxury yachts & F1 racing boats. Klegecell/Divinycell has been recognised as a world leader in high performance sandwich core strengthening.

LAYER 7 OUTER SEALER COAT

Glossy finish coat with a high quality waxed Polyester resin to protect the pool layers.

VINYL ESTER RESIN

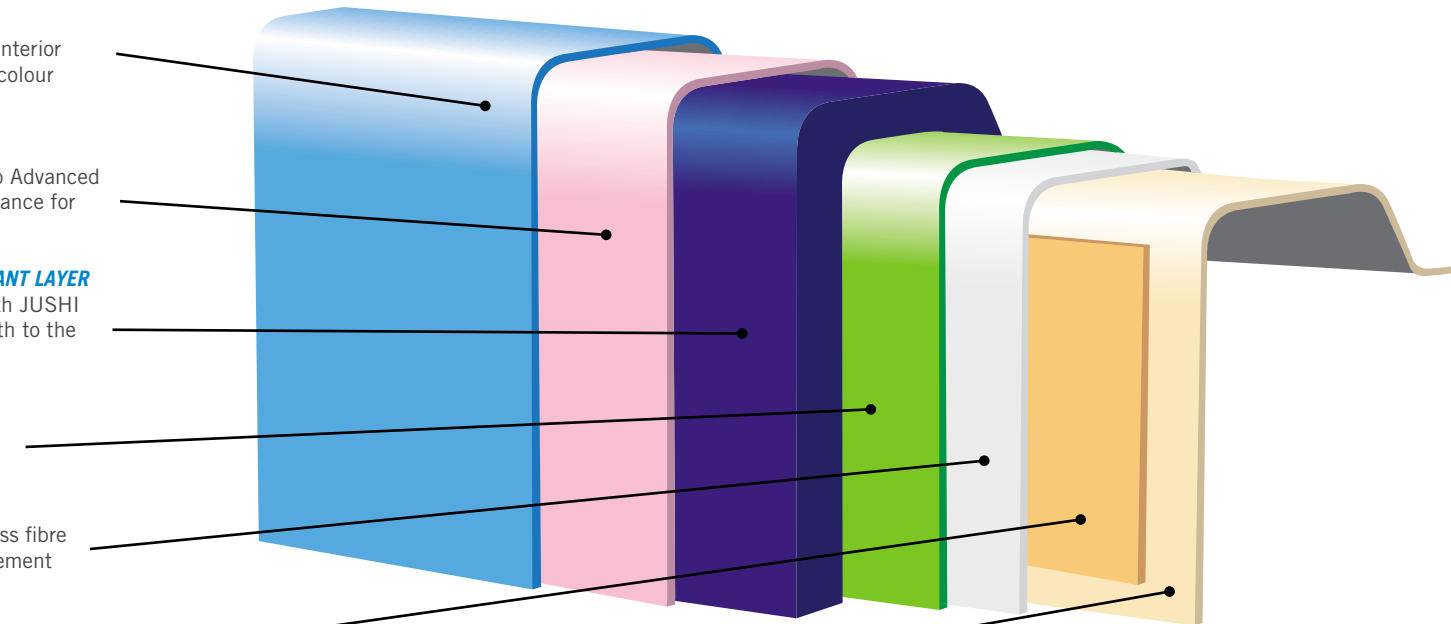

is the highest quality resin available for swimming pools with excellent resistance to osmosis, heat, corrosion and water damage. Vinyl Ester resin is twice the price of alternative resin types. Barrier Reef Pools uses three layers of Vinyl Ester resin in the manufacturing of our pools, ensuring a longer lasting pool with increased strength and protection.

Benefits of Vinyl Ester Resin “Making your pool last longer”

- Higher resistance to water penetration and damage (Osmosis)
- Higher resistance to heat
- Higher resistance from corrosion • Improved strength properties

Note: Lifetime guarantee is subject to standard Barrier Reef Pools warranty terms and Australian Standards.

New Generation high performance fibreglass

JUSHI E6-CR GLASS FIBRE

Is a High-performance environment-friendly glass fibre that replaces mainstream E glass fibre. JUSHI E6-CR is a new E-glass fibre with enhanced properties. It combines all the benefits of E-glass fibre with technical breakthroughs in strength, modulus, temperature resistance and acid corrosion resistance, thus meeting the requirements of the most demanding applications.

Compared with traditional E-glass fiber, JUSHI E6-CR offers the following unique benefits:

- Higher tensile strength
- Higher corrosion resistance
- Superior mechanical properties
- Higher temperature endurance
- Higher softening temperature
- Excellent environment durability

The Barrier Reef Difference

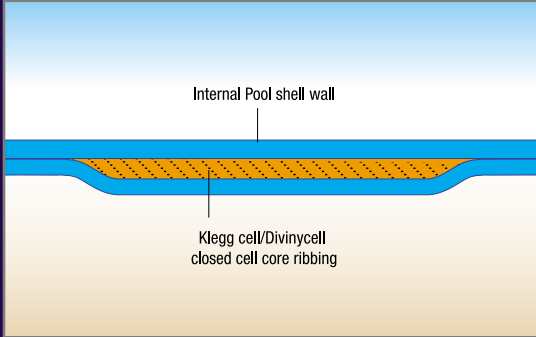

Barrier Reef Pools

The B.R.P (Barrier Reef Pools) unique coping process provides greater support than typical processes as the edge of the fibreglass coping is left open to allow the Concrete Bondbeam to lock under. This creates a solid foundation that will not flex so paving can be laid or water features can be added to the footings, which is similar to the foundations you would build your home on.

The B.R.P step design process is a time consuming but vital part in our backfilling process. The backfill is water compacted then pencil compacted under each step.

Klegcell/Divinycell Ribbing is 100% water resistant and will never deteriorate. It is a lightweight core material that provides stiffness and high impact resistance protection for the life of your swimming pool. It is a full core ribbing with no hollow voids. Klegcell is endorsed by Lloyds of London Marine Insurer.

Pencil Compaction & Concreting Process

1) PENCIL COMPACTION

Pencil compaction is a 'must do' around all pools as it is the best way to fully consolidate the excavated area between natural ground and the pool. After pencil compaction is completed the ground is instantly firm and therefore paving can start within weeks instead of having to wait months.

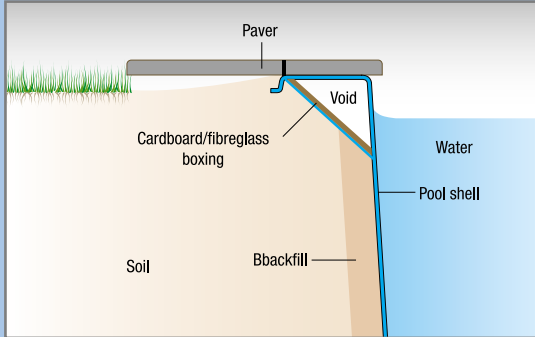

2) PREPARATION BEFORE CONCRETE

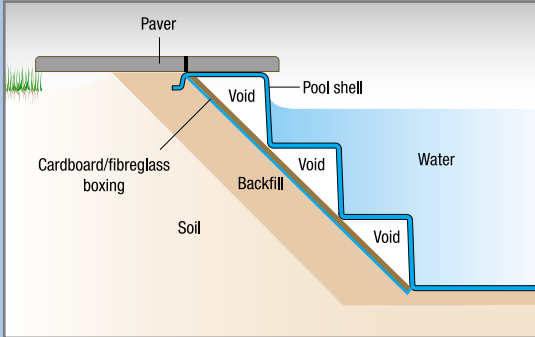

Timber boxing is formed up around the pool 350mm wide. Two rows of N-12 Bar (Reo Bar) are laid between the perimeter of the timber boxing and the pool shell connecting into the pool shell provisions.

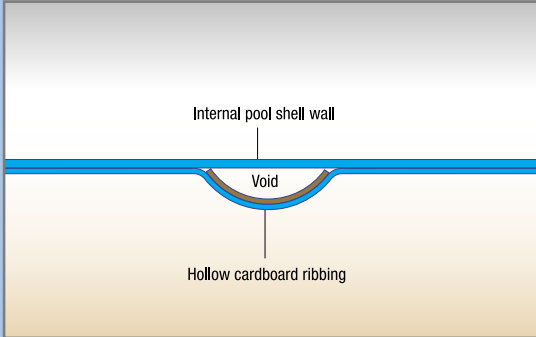

Typical Fibreglass Pools

The typical fibreglass pool coping uses cardboard and fibreglass to support the coping around the pool for paving. This may result in the coping of the pool flexing and therefore paving to come loose.

The boxing off on the step area of a fibreglass pool saves many hours of labour during the installation process, however this also leaves large voids under each seat & step.

Although stiff in appearance cardboard ribbing is subject to deterioration. Ground water and rainfall may be absorbed causing the cardboard to rot away if not fully sealed.

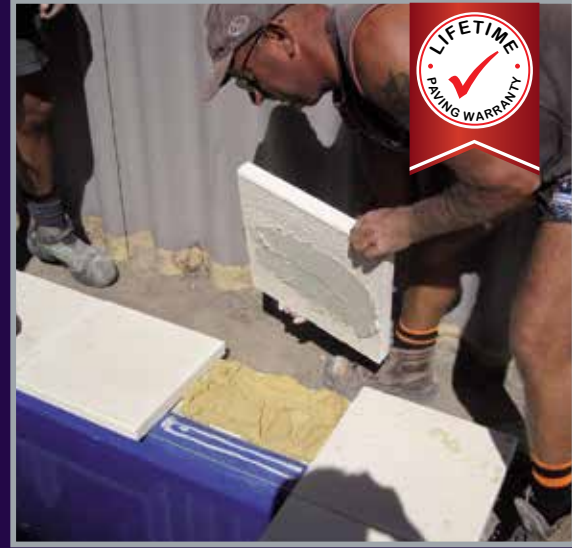

3) CONCRETE POUR

Concrete is then poured around the pool approx. 350mm wide x 150mm deep. The concrete is then screeded to approx 15mm fl 20mm below the top edge of the fibreglass. This footing provides a solid foundation for your pool headers to be fixed to and therefore will not allow any movement in the paving. (Optional 250mm x 150mm is also available).

4) PAVING BOND

As stated to the left concrete is left 15 - 20mm below the fibreglass edge. This is required so we can use a thick layer of paving bond between the concrete and the paver. This 4 Step process enables us to provide a Lifetime paving guarantee against any bullnose paving becoming loose around the pool's edge (the paving company must be accredited through Barrier Reef Pools WA Pty Ltd).
