WELCOME TO **FACTORY POOLS PERTH**

Factory Pools Perth is the newest member of the Barrier Reef Group.

Our company has been established to provide quality fibreglass swimming pools at an affordable price for Western Australian families.

We are industry leaders in swimming pool technology and innovation, including our own Advanced Pool Colour Technology and our patent pending Advanced Kevlar Coping System.

We offer a variety of new, modern and contemporary pool designs ranging from small to large pools, as well as spa and wader combinations.

Boasting a lifetime structural and surface guarantee, our pools are locally manufactured in our Eco friendly new state of the art Forrestdale facility in WA.

7 LAYERS OF QUALITY & STRENGTH

LAYER 1 INTERIOR SURFACE FINISH

Advanced Pool Colour Technology gelcoat with a Lifetime Interior Surface Guarantee that is UV and chemical resistant using the best colour technology currently available.

LAYER 2 ANTI-CORROSION BARRIER

Highest quality Vinyl Ester resin layer, providing excellent bonding to Advanced Pool Colour Technology as well as superior chemical and water resistance for the highest protection.

LAYER 3 FIRST STRUCTURAL LAYER AND ADDITIONAL CHEMICAL RESISTANT LAYER

Additional layer of the highest quality Vinyl Ester resin combined with JUSHI E6-CR glass fibre to further increase corrosion resistance and strength to the laminate.

LAYER 4 KEVLAR COPING SYSTEM LAYER

Consists of our World first patent pending Advanced Kevlar® Coping System combined with a third layer of the highest quality Vinyl Ester resin. "5 times stronger than steel".

LAYER 5 SECOND STRUCTURAL LAYER

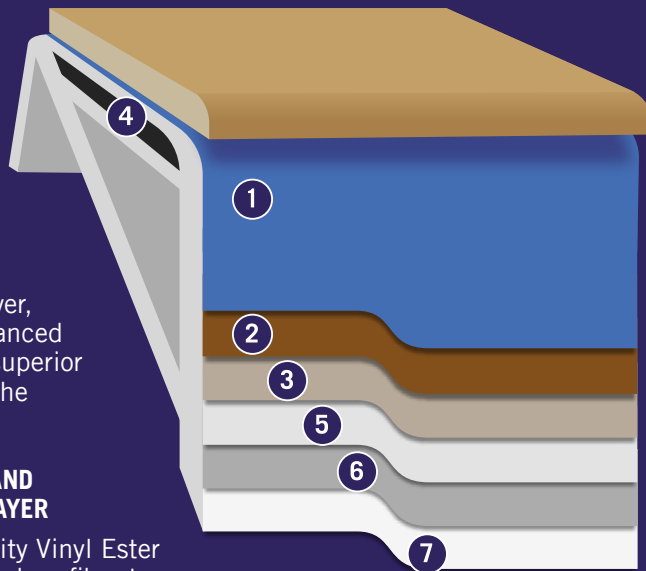

Consists of high quality Polyester resin and JUSHI E6-CR glass fibre with additional structural enhanced properties. No fillers used.

LAYER 6 REINFORCEMENT LAYER

Additional layer of high quality Polyester resin and JUSHI E6-CR glass fibre with additional structural enhanced properties added to the reinforcement structures on the pool shell. No fillers used.

LAYER 7 OUTER SEALER COAT

Glossy finish coat with a high quality waxed Polyester resin to protect the pool layers.

ADVANCED POOL COLOUR TECHNOLOGY VERSUS STANDARD POOL FINISH

- Gelcoat that is manufactured by an Internationally ISO 9001 company
- Gelcoat has been designed to withstand harsh Australian weather conditions
- Best Pigment technology currently available
- Superior UV weathering performance
- Superior Chemical resistance e.g Chlorine and Acid found in swimming pools
- Superb water resistance
- Highest resistance to osmotic blistering
- Tough, long-lasting and durable surface with gloss retention
- Lifetime Interior surface Guarantee

GELCOAT AND RESIN TECHNOLOGY

Factory Pools Perth sources our Advanced Pool Colour Technology "Gelcoat" from a Global Industry leader in Gelcoat and Resin technology who has been supplying to the swimming pool industry for over 20 years. This innovative Gelcoat and Resin technology can be found in products such as cars, planes, boats, bridges and now in our very own world class pools to ensure superior interior surface performance. Advanced Pool Colour Technology "Gelcoat" uses the best preforming pigment technology currently available. At Factory Pools Perth we include our Advanced Pool Colour Technology standard with all pool packages ensuring all our customers get the best pool finish available.

VINYL ESTER RESIN

is the highest quality resin available for swimming pools with excellent resistance to osmosis, heat, corrosion and water damage. Vinyl Ester resin is twice the price of alternative resin types. Factory Pools Perth uses three layers of Vinyl Ester resin in the manufacturing of our pools, ensuring a longer lasting pool with increased strength and protection.

Benefits of Vinyl Ester Resin "Making your pool last longer"

- Higher resistance to water penetration and damage (Osmosis)
- Higher resistance to heat
- Higher resistance from corrosion
- Improved strength properties

JUSHI E6-CR GLASS FIBRE

Is a High-performance environment-friendly glass fibre that replaces mainstream E glass fibre. JUSHI E6-CR is a new E-glass fibre with enhanced properties. It combines all the benefits of E-glass fibre with technical breakthroughs in strength, modulus, temperature resistance and acid corrosion resistance, thus meeting the requirements of the most demanding applications.

Compared with traditional E-glass fibre, JUSHI E6-CR offers the following unique benefits:

- Higher tensile strength
- Higher temperature endurance
- Higher corrosion resistance
- Higher softening temperature
- Superior mechanical properties
- Excellent environment durability

Note Factory Pools Perth do not use fillers "Modulus" or alternative Vinyl Ester Resin replacements to save costs.

Factory Pools Perth manufactures to surpass Australian standards AS/NZS 1838-2021, leading the swimming pool industry with innovation that's unrivaled, only using the best materials available. Our pools come with an Advanced Pool Colour Technology and Advanced Kevlar® Coping System both with a Lifetime Guarantee.

Australian Standard

SAI GLOBAL

WHAT DOES THE AUSTRALIAN STANDARDS 5 TICK CERTIFIED PRODUCT MEAN TO YOU?

Factory Pools Perth set the benchmark around the World for best practices in Manufacturing the highest quality fibreglass pools. There is no better way to prove this than by obtaining the prestigious Australian standards five tick product Certification.

To gain this certification we had to apply to Sai Global who is the Australian Standard Approval Authority. Their approval process is extremely involved and they assessed all sections of our fibreglass pool manufacturing process and procedures.

All materials supplied are rigidly controlled to meet performance specifications. There are no exceptions. This applies to gelcoat, resins, glass reinforcing materials, additional fixtures and fittings. All these materials are Lloyds of London/DNV approved products for the manufacture of fibreglass swimming pools.

The manufacturing process is monitored, documented, and recorded at every step, from the beginning process of preparing the mould, through to the full production, final detailing, inspection, storage, and transporting to the site. The operating conditions of the manufacturing facilities, such as temperature and humidity, are closely monitored and adjusted accordingly.

Once the pool is released from the mould, stringent and comprehensive testing is performed. The gelcoat finish and colour is visually inspected. The hardness of the surface is measured, as well as the wall thickness being checked at more than 25 positions around the pool. This is done by ultrasonic mechanic testing and recording. Every pool is weighed using an electronic digital scale to ensure the specified amount of material has been used during production stages to meet standards.

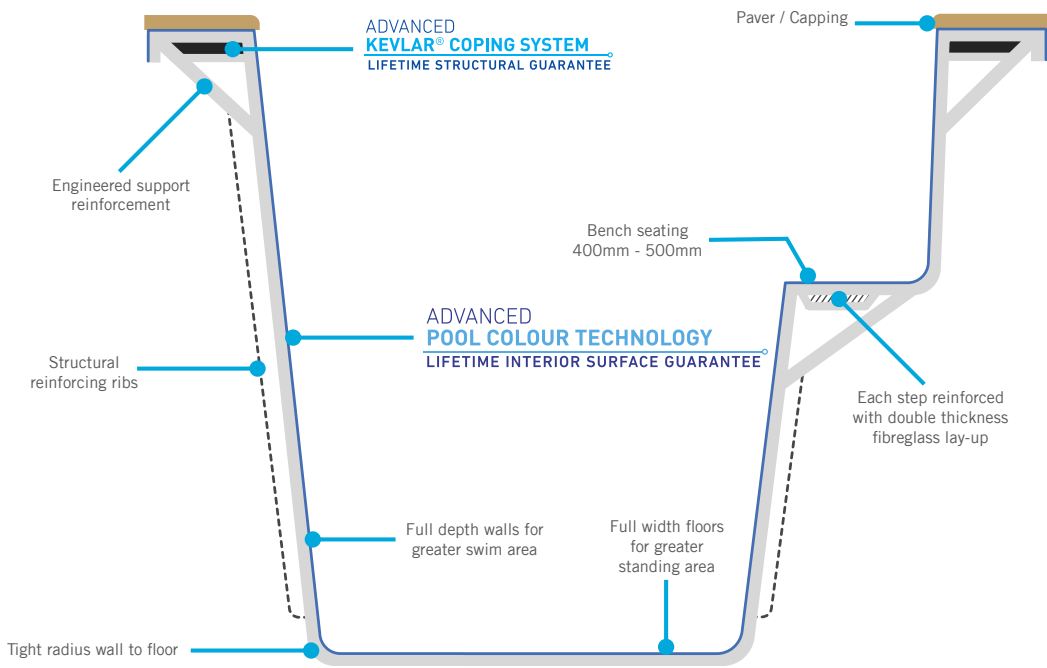

Every pool is embossed with our name as well as a unique 5 digit number which enables tracking and tracing of that pool easy for everyone to identify. Our master files record and document quality tests and results. We also keep and store a cut out of every pool shell manufactured in our Factory Pools Perth library, making it easy for future reference.
